

The ePen System

Benefits

- **Remotely captures handwritten notes and diagrams**
- **Upload, save and convert handwritten notes to typed text at the click of your mouse**
- **Converted text is fully editable thanks to the FREE full MyScript software included.**
- **Learns your handwriting using MyScript**
- **Use with ordinary paper and ink**
- **Stores 50 full pages of A4 text**
- **Save notes in the Note Manager software**
- **Backup your notes to CD or DVD**
- **Recycle your used paper**
- **Converts in 15 languages**
- **Use pen as a mouse/stylus**
- **Windows XP™ & Vista™ & Windows 7™ compatible**

Once plugged in, remotely captured notes are saved to your PC and converted to typed text to then be imported into MS Office™ applications like Word® and Outlook®. When connected, the pen also has mouse functionality for use with the 'digital inking' and 'tablet PC' features included with MS Vista™.

Pen Mode - Capture your notes remotely away from your PC or notebook.

The pen and memory base unit captures your natural handwriting in real time. Once you have captured & saved your notes, simply plug in the base unit and transfer your notes into the NoteManager software provided. Notes can then be backed up and converted to editable typed text with the MyScript recognition software and exported straight into office applications.

Mouse Mode - Mouse Mode turns the pen into a mouse with hovering and 2 button functionality. In Mouse mode you can write directly into Windows Journal, and other Tablet PC applications such as MS OneNote™, MSN Messenger™ and MS Outlook™. With Vista™ there's the extra feature of the 'digital ink handwriting software' feature where you can handwrite directly onto office applications like MS Word®.

What e-Pen Users say -

An independent Business Consultant and Author

In both capacities I jot down my thoughts as they occur - sometimes very random times and places! Since I started using e-Pen, I still lose the bits of paper but I haven't lost a single idea and the saving in time - that most precious commodity - is staggering.

Health and Safety Officer for a National Vocational Training Company

My work as a Health and Safety Officer takes me on several site visits a day. This obviously generates hours of Admin work - typing up notes, copying diagrams and filling out forms. e-Pen has dramatically reduced this admin time giving me more time to be out in the sites where I need to be!,

Minutes Secretary of a National Charity

I am the minutes secretary of a charitable organisation. The board meets every six weeks and every meeting generates up to 25 pages of notes. Before I had e-Pen it would take me several days to type up the minutes - now it's done in less than TWO HOURS! It's BRILLIANT!
